
OBJECTIVE

To obtain a challenging position as a software developer that will allow me to take on responsibility within a team, expand my technical expertise in software development and system architecture, and utilize my leadership skills.

EXPERIENCE

Contract Developer

September 2009 - Present

LMA Resources, Inc.

- Designed and developed in-house application handling customer resource management, sale staff productivity tracking, and order fulfillment utilizing Visual Studio 2008/2010, C#, ASP.NET, Win Forms, and SQL 2008.
- Worked extremely well with non-technical business stakeholders to understand, filter, and implement the most cost effective requirements while maintaining project's cost and timeline budgets and projections.
- Did extensive work to ensure that development would require minimum support due to the outsourced support capabilities of the company.

Lead Developer

November 2006 – July 2009

Alliance Payment Technologies, Inc. / Oasis Technology Services, Inc.

- I successfully supported an extensive ACH financial processing platform that is an N-tier, enterprise class application built with Microsoft.NET 1.1/3.5, ASP.NET, and Microsoft SQL 2008. It is written with Visual Basics.NET and C#, web service/WCF tier separation, and extensive T-SQL.
- Co-architect of a complete application re-write with Microsoft .NET 3.5, WCF, and C#.
- I work effectively with clients and company stakeholders to handle bug tracking and resolution, resolve performance issues involving complex business processes handling millions of records, and new feature design and implementation.
- I efficiently worked as Lead Programmer to bring synergy to a solution oriented team environment to offer end users a robust, stable, and productive product
- I successfully coordinated departmental project management through all stages of the software development life cycle.
- I worked extensively with .NET 1.1 - 3.5, ASP.NET, VB.NET 2003-2008, C# 3.0, and MS SQL 2008 & extensive T-SQL
- Consistently work with development staff to create and uphold company's coding standards and best practices.
- Received a promotion from Programmer to Lead Developer for my commitment to maintaining quality development

Developer / Network Administrator

July 2006 – November 2006

Laclede, Inc.

- Developed multi-user windows application that increased processing of consumer rebate program consisting of an excess of 20,000 transactions per rebate campaign
- Maintained and configured WAN/LAN network operation in an extensive Cisco/windows/Lotus Domino environment

Developer / Network Manager

January 2003 - July 2006

Manzo, Morgan & Associates, Inc.

- Developed and tested new logistical and financial reporting system using Visual Basic.NET with a SQL Server
- Developed an intranet ASP.NET application could perform sales and job management field agents
- Developed a COM+ component that integrated an in-house application with Microsoft CRM 2.1
- Maintained network security and Administration for internal users and VPN clients utilizing Cisco IOS Routers and PIX Firewalls and Maintained Mail and File Servers utilizing Microsoft Windows Server 2003 and Microsoft Exchange 2003

Supervising Network Engineer

August 2000 – January 2003

Worldwide Solutions

- Successfully managed six field technicians and provided second level support and over saw their workload and job scheduling wil increasing the level of client experience by providing excellent service to customers.
- Personally designed, implemented, maintained, and troubleshot many different types of systems, network operating systems, and LAN/WAN technologies, including Windows 2000/NT, Netware 3.12 - 5.1, MS Exchange, Cisco IOS/PIX and many types vendor specific hardware equipment

Network/System Engineer

February 1998 – August 2000

Tripole MicroAge

- Performed nationwide installations, upgrades, and support for numerous clients of Integration & Solutions Business
- Lead engineer on nationwide Novell Netware 4.11 rollout and integration
- Provided technicians with second level support, on site and over the phone

Regional Systems Operator

June 1995 – February 1998

Apria Healthcare

- Phone/user support for 10 branches throughout southern California supporting over 450 connections with PC, LAN, and application troubleshooting
- Performed system upgrades, repairs, backups and restores for AS/400, Novel Netware, and scheduling of job control for proprietary Network Operating System

CERTIFICATIONS

ORGANIZATION	CERTIFICATE	DATE RECIEVED
Cisco	Cisco Certified Network Associate, CCNA	September 2002
Comptia	I-Net+ Certified Internetwork Professional	June 2001
Comptia	Network+ Certified Network Technician	August 2001
Comptia	A+ Certified Computer Technician	July 2001
Computer Learning Center	Certified System Operator	November 1995
Prosoft Training	Certified Internet Webmaster, CIW	June 2001

TECHNICAL KNOWLEDGEBASE**Software/Web Development**

- Database: Data Modeling, Use Microsoft SQL Server 7 - 2008 and Microsoft Access 4.2 – 2003 for database design through the use of normalization, stored procedures, triggers, and views; Data redundancy, and optimization with indexes, query reconstruction, and database partitioning
- Microsoft Visual Studio 6.0 to 2010
- Proficient in: Microsoft Visual Basic.NET, C#, ASP.NET 1.0 – 4.0, Microsoft .NET Framework 1.x to 4.0, ADO 2.x & ADO.NET 1.0 – 4.0, Transact-SQL(T-SQL), XML, Web Services, WCF, Crystal Reports, Third-Party Windows and Web Controls, DotNetNuke, HTML, CSS, Apex SQLDiff, ASP.NET AJAX ToolKit Controls, Telerik Controls
- Familiar with: Microsoft Visual C++.NET, Microsoft Visual Basic 6.0, VBScript, Classic ASP, JavaScript, ActiveX/COM components, Seapine Surround SCM, Visual SourceSafe 2005, Team Foundation Server

LAN/WAN

- Design, install, and troubleshoot local area networks, wide area networks, and related equipment in a client server network environment for Novell NetWare (3.x-5.x) and Windows NT/2000/XP/2003
- Securely configure, troubleshoot network clients for network, wireless, Internet connectivity, and application usage
- Frame relay/T1 WAN connectivity and security with a host of routers and firewalls
- Cisco, Netgear, Netopia, 3Com, Microsoft ISA, Bay Networks, Cabletron, and Synoptic routers, firewalls, hubs, and switches
- VPNs, IIS, IPX, TCP/IP, DNS, Active Directory, DHCP, WINS, RIP, SMTP, POP3, FTP, IDS Snort, Network Sniffing/Scanning and other network tools and protocols

Operating Systems

- MS DOS 4.01 to 6.22, Microsoft Windows 3.0 to Windows 7, Windows NT 4, Windows 2000-2008 Server Family, IBM OS/2, Novell NetWare 3.x to 5.x, IBM MVS/JES2, IBM OS/400, Linux(Limited Exposure), Mac OS (Limited Exposure)

Applications

- Cisco IOS/PIX 10.0+, MS Office 4.2 - 2007, MS Exchange 5.0 - 2003, IIS 5.0-7.0, SQL Server 7.0 to 2008, Rumba/Client Access, HP JetAdmin, Symantec Backup Exec, Symantec CPS, Quickbooks, WordPerfect, Lotus Domino\Notes, Reflections, Internet Explorer, Netscape Navigator, MacAfee Product Line, Adobe Acrobat, Adobe Photoshop, PCAnywhere, and Symantec/Norton Enterprise, System, and Antivirus Utilities
- Various PBX and voicemail software platforms and VoIP
- Website and component load balancing/Clustering with Microsoft Windows Server functionality

Hardware

- Experience with Intel-based PC's since the early nineties, (workstations and file servers), Monitors, Printers, RAID systems, and other peripherals
- Networking products for Ethernet, Token ring, UTP cabling, coax cabling, wireless, and a host of test equipment
- Cisco firewalls, routers, and switches, and many other vendor specific network equipment.
- Network Cabling - 66 Blocks and patch panel punch downs, horizontal cabling, and EIA/TIA standards

EDUCATION**Goldenwest College**

August 2000 – June 2003

Huntington Beach, CA

- Major: Computer Science and Information Technology

Computer Learning Center

April 1995 to November 1995

Anaheim, CA

- An accelerated 700 hour, hands-on course that included DOS, Advanced LAN using Novell 3.12, OS/MVS JCL Operations, AS/400 Operations, UNIX Administration, and Business Communications
